JAMES BIANCOSPINO AND THE SEVEN MAGICAL STONES

Simone Chialchia

James is a boy like many others and, while he's walking his dog, he faints and finds himself brought back to the dawn of the XVI Century. The "Brotherhood of Light" is engaged in a struggle against "The cult of the Dark Ones", composed by the "undead", the damned that sold their soul to Evil. Among the weapons used to fight there are seven magical stones, each associated to a planet of the solar system and equipped with special powers. James is fated to use Sienite, linked to Venus, which allows him to travel back in time. After a very harsh training, the boy will join the Brotherhood and he will have to face the Dark Ones, who want to obtain his power.

In the final part of the novel, after falling in love with Scarlet, he will stand and watch helplessly as Gabriel dies and one of his Brothers betray him.

After he finds out who the traitor is, James wakes up in his bed, in 2019, connected to a machine.
