

RUSSIAN SPIRITUAL RADIESTHESIA AND THE RADIESTHESIC TECHNOLOGIES FOR THE WELL-BEING OF THE MULTIDIMENSIONAL MAN

Olga Samarina

The early XXI Century in Russia was marked by the growth of the spiritual aspect and by the creation of the new bio-informational technologies. In Spiritual Radiesthesia one works in close cooperation with one's own Supreme Self, intended as a triad of Spirit, Soul and Subconscious, thus becoming a true "disciple" of his own divine side, which links him with a reality of higher order. This connection gives birth to the "radiesthetic technologies", which form a deeply ramified method to cleanse the multidimensional organism of negative programmes. The practitioner, starting from symbolic language, gradually transforms and simplifies his techniques, to go beyond matter and grow, feeling part of the System of the Supreme Mind.
